

Mr. Armstrong said

Hey, Mr. Armstrong I feel so weird

despite the good reception

Hey, Mr. Armstrong please push the button

and let's communicate

A flashing red light above my head, parapampam

The manual does not address this case

the temperature is rising

Hey, Mr. Armstrong I feel so weird

despite the good reception

Hey, Mr. Armstrong please push the button

and let's communicate

Open the main valve and let the steam out,

Pull down the lever, let it rip your face off

Never mind what you leave behind

As Mr. Armstrong said...

Just deal with the dashboard, try to figure out

How the lunar gravity's affecting our flight

Just call Houston if you're in doubt

As Mr. Armstrong said...

The more I'm looking, the less I see, parapampam

The explainable reason of we're just drifting

Guess the propulsion is down

Hey, Mr. Armstrong I feel so weird
despite the good reception
Hey, Mr. Armstrong please push the button
and let's communicate

Just deal with the dashboard, try to figure out
How the lunar gravity's affecting our flight
Just call Houston if you're in doubt
As Mr. Armstrong said...
Open the main valve and let the steam out,
Pull down the lever, let it rip your face off
Never mind what you leave behind
As Mr. Armstrong said...

I'm going Alpha Whisky Alpha Yankee

The malfunction indicator lights,
Blink like fireflies, just catching my eyes.
Our fate is as steady as we're rolling the dice
No chance to stabilize
A flashing red light above my head
Ensures that as you hear this, I'll be dead
Never mind what you leave behind
That's what Mr. Armstrong said!
